

Sands-Constellation Center for Critical Care

Medical ICU and Medical/Surgical Unit

FLOOR 5

The fifth floor is the first of three identical patient bed floors, each of which feature 36 private, acuity-adaptable rooms. Providing different levels of care in the same room results in greater efficiency and better outcomes.

- The floor includes a Medical ICU and Medical/Surgical Unit, each with 18 private patient rooms.
- The patient rooms are large enough to provide patient, family and caregiver “zones,” enhancing the quality of care and comfort.
- Nurse support is extensive, with central stations as well as work stations or “caregiver alcoves” overlooking each room.

See reverse side for named gift opportunities. >>
